SANDY'S DAILY MESSAGE

It's so weird, but things at school seem so much busier!

Arranging Annual Review meetings that had to be cancelled; daily reporting to the DfE; maintaining contact with families in lockdown (which we love); endless Zoom meetings; ensuring all our health and safety measures remain in place and forward planning for a return to school - whenever that may be!

It's at times like this that I really value the staff we have here at The Link.

Everyone really does work as a team and it is this strong work ethic that makes all we are achieving in the current climate possible.

Thank you to staff, pupils and parents for coping during these strange times.

Sandy

ACTIVITIES / LINKS THAT MIGHT BE HELPFUL

Puneet, one of our SSAs from Acorn has sent in a couple of pictures that she knows some of our younger pupils will love to colour. Please find them attached.

Lesley has sent in another recipe that is a favourite with members of our After School Cookery Club - American Pancakes.

Why not try and make them over the Bank Holiday weekend - after all without our Allied forces, World War II would not have ended when it did!

WHAT'S EVERYONE BEEN UP TO?

With VE Day in mind, Kian has been busy making bunting to hang in his street at home.

As they have been a source of great interest for almost a month, the playground was immediately evacuated, so that we could all watch from a distance and not disturb them.

One decided to fly into the bushes, whilst the other one thought it would have a go on one of our scooters.

The concentration he displayed whilst completing this task was admirable and we are sure his bunting will be the best in town.

We had a bit of excitement here in school today.

Two of the baby *Great Tits* that had hatched in their nest in the really old apple tree in our main playground decided to fledge the nest.

Kevin, our Site Manager then gently moved them to a quiet spot in the canopy area and after a while their parents flew down to feed them.

We couldn't have hoped for a living science lesson like this!!

Nature at it's best!
